

Security Information and Event Management (SIEM)

IBM QRadar® on Cloud with the Watson Advisor® and Vulnerability Manager

Prevent

Detect

Respond

Manage

Accelerate cybersecurity threat detection and investigation

Strengthen security posture against an ever growing number of threats

Stop flying blind and **free up IT** resources from costly reactive efforts to security incidents

Detect sophisticated, stealthy attacks happening in your network before the damage is done

Expose damaging insider threats quickly and accurately

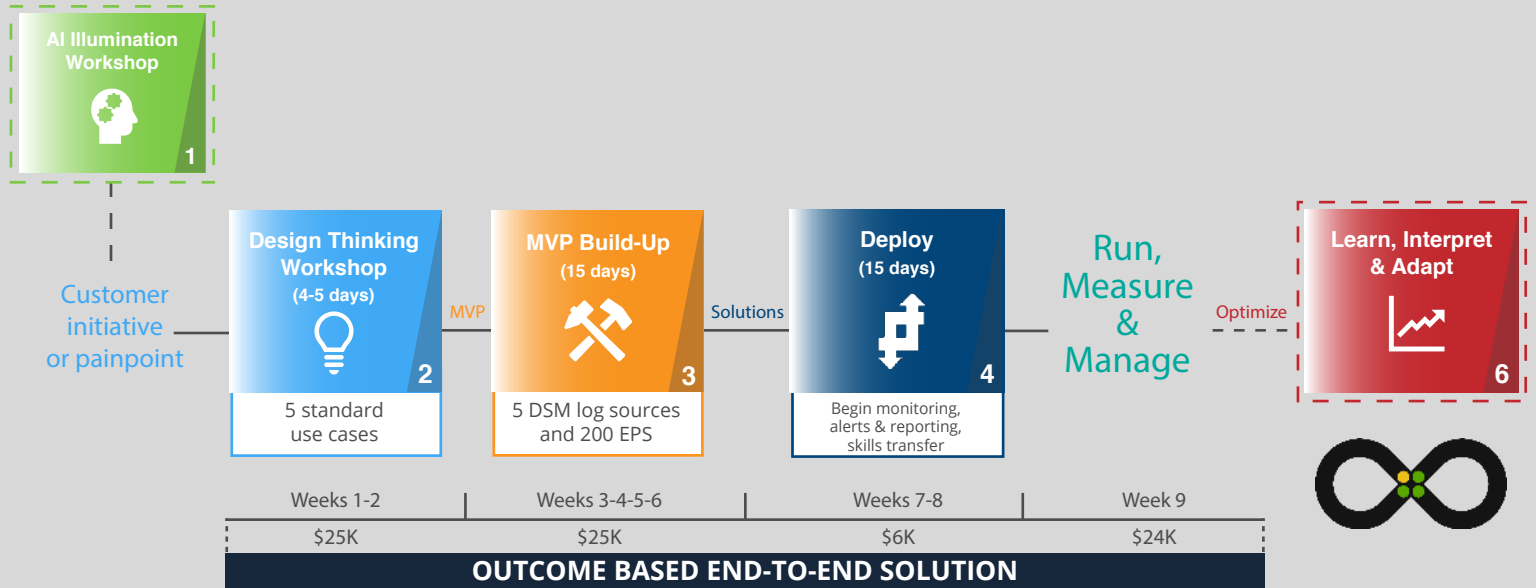

Protect data privacy and ensure compliance with GDPR and other regulations

Security analysts feel the pressures of data overload and are often unable to manage the enormous daily volume of incident alerts, leaving businesses vulnerable to unaddressed security threats. Detect and respond to cybersecurity attacks and network breaches faster using artificial intelligence to automatically investigate indicators of compromise and provide critical insights.

About Smart Accelerators

Smart Accelerators are fixed-price offerings that deliver Design-driven Agility and Execution based on SIA Next Generation Services. They combine Design Thinking with an MVP (Minimum Viable Product) Build-up & Deployment and Cloud Managed Services to deliver rapid time to value. Deploy a pilot project in 3 months or less and let us manage the cloud-based solution for you!

**“Think Big,
Start Small,
Scale Fast!”**

SILVER OFFERING*

One Time Charge

\$80,000

M3C
Multi-Cloud Command Center
for Security

3 months of service*

Options after 3 months

A Renew for year at \$8K/month

B Expand to more event sources & eps

C Enhance design

“Rapid time to value!”

*Subject to special client requirements and resource availability. AI Illumination Workshop is an optional additional service (\$5,000). Design Thinking Workshop offered at a special discounted price when conducted as part of a Smart Accelerator (list price \$35K). Prices shown in Canadian dollars, excluding out-of-pocket expenses and applicable taxes. Upon acceptance of SIA terms & conditions.

*Includes 3 months of provisioning for IBM QRadar on Cloud plus IBM QRadar Advisor with Watson and Vulnerability Manager Add-on. Managed services include rule tuning, security alert management, log management & retention, operational reporting & dashboard (1 client request per month), threat monitoring, incident management assistance (up to 20 hours per quarter), update & patch management and health & performance monitoring. Optional additional services include new use case development, additional incident management assistance and data breach support.
