

Incident Response Platform (IRP)

IBM Resilient® (Security & Action modules)

Prevent

Detect

Resolve

Manage

Dramatically **accelerate** and **sharpen** your response to cybersecurity incidents

Outsmart, outpace and **outmaneuver** cyberattacks

Increase data breach readiness and **reduce** the cost of incident response

Create and automate playbooks for fast and effective incident response

Improve IR collaboration across your organization—from IT to legal, HR and marketing

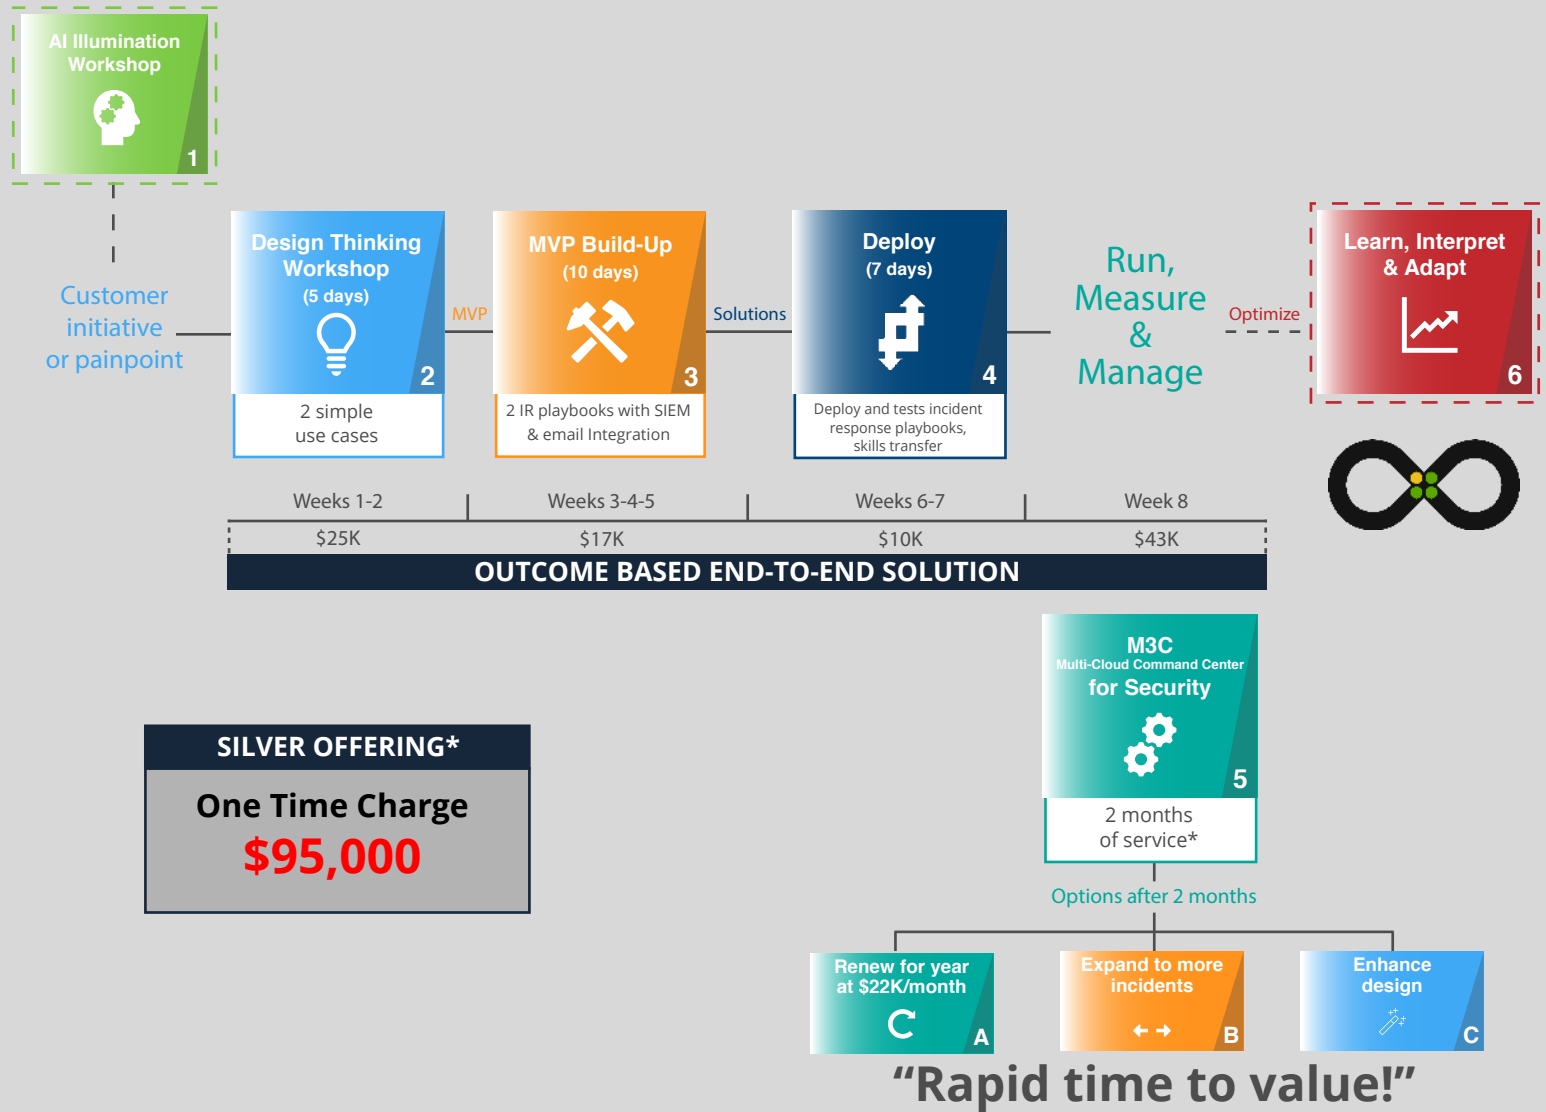

Proactively simulate and test your incident response plans

Organizations today battle complex cyberattacks, complicated technology environments, and a growing skills gap – making effective response more complicated than ever. Intelligent Orchestration seamlessly combines case management and automation into a single platform that delivers real-time visibility across your SOC tools and guided response to complex cyberattacks.

About Smart Accelerators

Smart Accelerators are fixed-price offerings that deliver Design-driven Agility and Execution based on SIA Next Generation Services. They combine Design Thinking with an MVP (Minimum Viable Product) Build-up & Deployment and Cloud Managed Services to deliver rapid time to value. Deploy a pilot project in 3 months or less and let us manage the cloud-based solution for you!

**“Think Big,
Start Small,
Scale Fast!”**

*Subject to special client requirements and resource availability. AI Illumination Workshop is an optional additional service (\$5,000). Design Thinking Workshop offered at a special discounted price when conducted as part of a Smart Accelerator (list price \$35K). Prices shown in Canadian dollars, excluding out-of-pocket expenses and applicable taxes. Upon acceptance of SIA terms & conditions.

*Includes 2 months of provisioning for IBM Resilient on Cloud (Security & Action modules). Managed services include up to 30 hours of support per month for license management, user & permission management, log management, incident workflow updates, system health check, incident monitoring, dashboard & reporting setup, system backup. Sunsetting charge of \$10,000 applies upon termination of M3C (Multi-Cloud Command Center) subscription. Optional additional services include new use case development, additional incident management assistance and data breach support.
